

## New Soy Products Available from Nutek

When there's a mess around the house or in the garage, instead of turning to a cleaner that uses petrochemicals, look to soy to clean up. The United Soybean Board (USB) works to help companies develop soy products such as soy cleaners and degreasers, many of which can be found on USB's online [Soy Products Guide](#). One line of products that anyone can buy for

their home is Ohio-based Nutek's line of soy cleaners and lubricants.

The wide variety of Nutek's soy products speaks to the versatility of the bean itself. For instance, Nutek's Bolt Off™ product soy-based formulation provides the strength needed to get a corroded bolt to turn, while Nutek's line of Simply Soy® Wipes offers a gentle cleanser for delicate tools and grills.

"Soybean oil is proven to be much more lubricious than petrochemicals," says Horton. "In heavy machinery applications, the hotter the soy oil gets, the better it protects."

Besides performing better in some instances, using soy products reduces U.S. dependence on foreign petrochemicals by using a domestically produced resource.

"Nutek formulations use 30 percent to 100 percent soy," says Horton. "We try to source all of our soybeans from local Ohio sources, grown by Ohio farmers."

Using soy products can mean a healthier economy, and it also can benefit the health of the people using them by reducing Volatile Organic Compound (VOC) exposure. For more information on soy products of all kinds or to visit USB's online Soy Products Guide, go to [www.soynewuses.org](http://www.soynewuses.org). For more information on Nutek's line of soy products, visit [www.nutekgreen.com](http://www.nutekgreen.com).

USB is made up of 68 farmer-directors who oversee the investments of the soybean checkoff on behalf of all U.S. soybean farmers. Checkoff funds are invested in the areas of animal utilization, human utilization, industrial utilization, industry relations, market access and supply. As stipulated in the Soybean Promotion, Research and Consumer Information Act, USDA's Agricultural Marketing Service has oversight responsibilities for USB and the soybean checkoff.
